
PROFESSIONAL SUMMARY

Product and design leader with 20 years of experience building digital products and more than 10 years leading product, UX, and front-end teams. Experienced in 0-to-1 product development, complex data products, design systems, and commercialization. Combines user insight, analytics, technical fluency, Python, and AI-assisted workflows to turn complex business needs into practical product decisions.

PROFESSIONAL EXPERIENCE

House579 | Head of Product Mar 2025–Present | Taiwan

Role scope: Product strategy and day-to-day product development for a real estate listing platform, spanning UX, data operations, commercialization, and cross-functional delivery.

- Built and launched the platform from the ground up, defining its positioning, information architecture, core workflows, and operating model.
- Led the transition from a free service to a paid model, growing the platform to 50,000+ listings from paid customers, 3,000+ agents, and 6,000+ members, while establishing partnerships with two nationwide real estate franchise brands.
- Redesigned the agent onboarding journey from registration to first listing. Faster sign-in, linked data, and listing migration supported nearly 200,000 free listings within several months with limited customer support.
- Established a product improvement loop using Microsoft Clarity, GA4, frontline feedback, and Python-based data checks to improve mobile workflows and listing reliability.

Rakuya Inc. | Chief of Experience / Product Lead Aug 2021–Mar 2025 | Taipei, Taiwan

Role scope: Owned product direction for realtor intelligence products that turned fragmented property, transaction, and pricing data into practical prospecting workflows.

- Led a seven-person team of one product manager, three UI/UX designers, and three front-end developers, with responsibility for hiring, planning, coaching, and design quality.
- Launched data products that combined multiple sources into workflows for property identification, pricing analysis, and market development.
- Reframed the MVP from a standalone analytics feature into a complete prospecting workflow based on agent interviews and competitor analysis, contributing to partnerships with three nationwide real estate franchise brands.

Rakuya Inc. | Design Manager

Mar 2011-Aug 2021 | Taipei, Taiwan

Role scope: Led design operations and front-end collaboration as the company moved from page-based production to component-based product development.

- Built the company's corporate identity and design system, including brand standards, Atomic Design principles, a Figma library, and documentation adopted by three product teams.
- Established shared governance for component creation and updates through daily design stand-ups and cross-team review, reducing duplicated specifications and unnecessary variations.
- Modernized design and front-end delivery through responsive design, version control, component-based-workflows, and Vue development.

yes123 Job Bank | Web Designer

Jul 2007-Feb 2011 | Taiwan

- Designed platform interfaces, campaign pages, and marketing pages; helped move legacy table-based layouts to DIV/HTML5 structures and led visual direction for job fairs and marketing initiatives.

PChome Online | Web Designer

May 2006-Jun 2007 | Taiwan

- Designed campaign pages, email marketing materials, digital ads, portal experiences, and print collateral for consumer internet services.
